Crowd-Funding console app

Crowdfunding is the practice of funding a project or venture by raising small amounts of money from a large number of people, typically via the Internet. Crowdfunding is a form of crowdsourcing and alternative finance. In 2015, over US$34 billion was raised worldwide by crowdfunding. (From Wikipedia)

The aim of the project: Create a console app to start fundraise projects.

The app should include the following features:

1 - **Authentication System**:
- Registration: getpass python
    - First name
    - Last name
    - Email
    - Password
    - Confirm password
    - Mobile phone [validated against Egyptian phone numbers]
- Login
    - The user should be able to login after activation using his email and password

2 - **Projects**:
- The user can create a project fund raise campaign which contains:
    - Title
    - Details
    - Total target (i.e 250000 EGP)
    - Set start/end time for the campaign (validate the date formula)

- User can view all projects
- User can edit his own projects
- User can delete his own project
- User can search for a project using date (bonus)
